Sourav Gupta

Software Engineer | Java, Spring Boot, SQL & Distributed Systems | Platform Automation (EU Client) | Anthropic Claude Certified

Greater Jaipur Area

Summary

I am a Backend Software Developer who designs and builds high-throughput services, scalable database architectures, and automated platform workflows. With solid foundations in Core Java, relational database engineering, and Object-Oriented Design, I focus on shipping modular, maintainable, production-ready code.Currently at Tata Consultancy Services (TCS), I engineer platform reliability solutions and enterprise workflow automations for a Netherlands-based enterprise engineering client. In addition to enterprise systems, I actively build independent consumer applications, optimize analytical data pipelines, and incorporate modern AI toolchains (Anthropic Claude API, GitHub Copilot) into the developer lifecycle.Key Engineering Highlights:- Product Engineering: Architected and deployed "Shringar" (an on-demand doorstep booking platform), building custom backend booking logic, availability matching, and cut post-release bug frequency by ~80%.- Database Performance: Built data staging pipelines handling Slowly Changing Dimensions (SCD Type 1 and 2) and optimized complex SQL schemas, boosting query performance by 40% at Celebal Technologies.- Enterprise Automation: Developed and maintained 8+ production ServiceNow automated workflows (CAD Certified) supporting 200–500 international enterprise users.- Problem Solving and Algorithmic Foundations: 5-Star HackerRank in C++ and SQL; led a 4-person team to finish in the Top 20 out of 250 teams nationwide at the Pink City Healthcare Hackathon.Technical Stack & Core Competencies:- Languages: Java (11/17), C++, SQL (PostgreSQL, MySQL), Apex, JavaScript, HTML5/ CSS3- Backend & Systems: RESTful APIs, Microservices, Object-Oriented Programming (OOP), System Design, Data Structures & Algorithms (DSA)- Databases & Data Engineering: Relational Schema Design, Query Optimization, Index Tuning, Data Warehousing, SCD, ETL- Cloud, Tooling & DevOps: Git, GitHub, Docker, ServiceNow (CAD/CSA), Salesforce (LWC/Apex), MuleSoft, Postman, Linux, JUnit- Certifications:

Claude Certified Developer - Foundations | ServiceNow Certified Application Developer (CAD) | SAP Certified - ABAP CloudOpen to Software Engineering and Backend Developer opportunities across European tech ecosystems and global product organizations.GitHub: github.com/Sourav1323Email: souravgupta.it25@gmail.com

Experience

Tata Consultancy Services
Assistant System Engineer
December 2025 - Present (11 months)
Banglore

• Engineered platform reliability and technical workflow delivery for a Netherlands-based enterprise engineering client (200–500 users), resolving 30+ complex technical incidents weekly and maintaining high uptime for core server operations.
• Designed and maintained 8+ ServiceNow workflow automations and script includes, streamlining infrastructure operations and eliminating manual administrative overhead.
• Integrated AI-assisted engineering workflows (Anthropic Claude API, GitHub Copilot) into the SDLC, accelerating test-case generation, API debugging, and documentation cycles.
• Designed and implemented a Java-based Parcel Management System applying OOP principles, modular service layers, and relational SQL database schemas for parcel lifecycle tracking.
• Recognized with an On-the-Spot Award for client service contributions and proactive platform enhancements.

Kloudeva LLC
Salesforce Developer
November 2024 - December 2024 (2 months)
Uzbekistan

Embarking on an internship as a Salesforce Developer at Kloudeva LLC offers an exciting opportunity to dive into the dynamic world of cloud-based customer relationship management (CRM). As an intern, I'll gain hands-on experience working with Salesforce technologies, tools, and applications to design, develop, and optimize CRM solutions tailored to real-world business needs.

Celebal Technologies

SQL Developer Intern
May 2024 - July 2024 (3 months)

Completed 6 structured assignments covering advanced SQL concepts including DDL, built-in functions, indexing, triggers, and schema design. Engineered a data pipeline using real-world datasets implementing Early Arriving Fact handling and Slowly Changing Dimensions (SCD) for data warehousing. Optimized SQL queries through strategic indexing techniques, achieving up to 40% improvement in query execution performance.

Education

Jaipur Engineering College and Research Centre (JECRC)
Bachelor of Technology - BTech, It · (November 2021 - June 2025)
